Restriction Requirement

Restriction to one of the following inventions is required under

35 U.S.C. 121:

- I. Claims 12,13,21-24, drawn to first method for generating protein library, classified in class 702, subclass 19.
- II. Claims 26-29, drawn to second method for generating protein library, classified in class 702, subclass 19.
- III. Claims 30-32, drawn to third method for generating protein library, classified in class 702, subclass 19.
- IV. Claim 32, drawn to fourth method for generating protein library, classified in class 702, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as independent and/or patentably distinct methods which have different steps and different modes of operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
